

At first glance you may think we are a typical office furniture supplier. But we are much more. Because we offer so much more...

Ergonomics Products & Workstation Assessments

Training & Education

Workplace Design & Office Projects

Sustainability & Recycling Projects

If you are thinking of...

- updating or modernising your office environment
- improving the physical and mental wellbeing of your people through furniture, equipment or training
- committing to a Sit-Stand strategy
- introducing initiatives and technologies around flexible working, hot-desking, working from home
- carrying out workstation assessments or training staff to become in-house DSE Workstation Assessors
- pursuing a combination of any of these

...why not let Osmond Ergonomics take the burden?

We have the knowledge, skills and resources to guide you through these processes and support you with the implementation of these specialist tasks.

In summary – we can help you create a wellbeing-focused workplace, select the right products that represent your business

and support your people, carry out workstation assessments, provide posture training for your teams, deliver industry-approved training modules. But this is not all.

Whilst wellbeing is central to all our activities, our genuine focus is on achieving the best outcome for you rather than just making a compulsory sale. This approach adds meaningful value to all our undertakings and safeguards our reputation as a trusted partner rather than a mere supplier.

More importantly, it is what sets us apart. We really do care. About our clients' organisations and their people. And not to forget – our Planet. We take the environmental impact of our actions seriously. We apply sustainability criteria not only to our products and service delivery systems, but also to everyone in our supply chain.

Let us support you with the knowledge we have gained from working with organisations with one employee to hundreds of thousands for over 25 years.

Knowledge > Innovation > Productivity > Sustainability

HEALTHY PEOPLE STORE – Ergonomics Products & Workstation Assessments

We make sure our product range is user friendly and meets ergonomics expectations. To meet our stringent criteria, all our featured products first undergo the 'WoW Factor' test. This process is unique to the industry and considers quality, physical ergonomics, human factors, sustainability and value. This initiative forms part of our ISO9001 quality system and ensures the best products for our customers.

HEALTHY PLANET – Sustainability & Recycling Projects

The UK government has committed to Net Zero Emissions by 2050. Many local authorities have set shorter timescales. Commercial properties and their occupants must play a significant part in these commitments.

Businesses realise that it is time to consider ways of reducing embodied carbon produced in the manufacture of furniture, fixtures and fittings. With our ethical choice of sustainable, recycled, recyclable and remanufactured products we can help businesses cause less environmental impact and achieve low carbon installations. Saving energy and resources forms part of our wider low carbon strategy. We are committed to creating quality and environmental sustainability throughout our entire supply network.
